

MoceanAPI Broadcast Plugin

MoceanAPI Broadcast plugin allows sending of text messages in bulk to contacts (leads) by using MoceanAPI service.

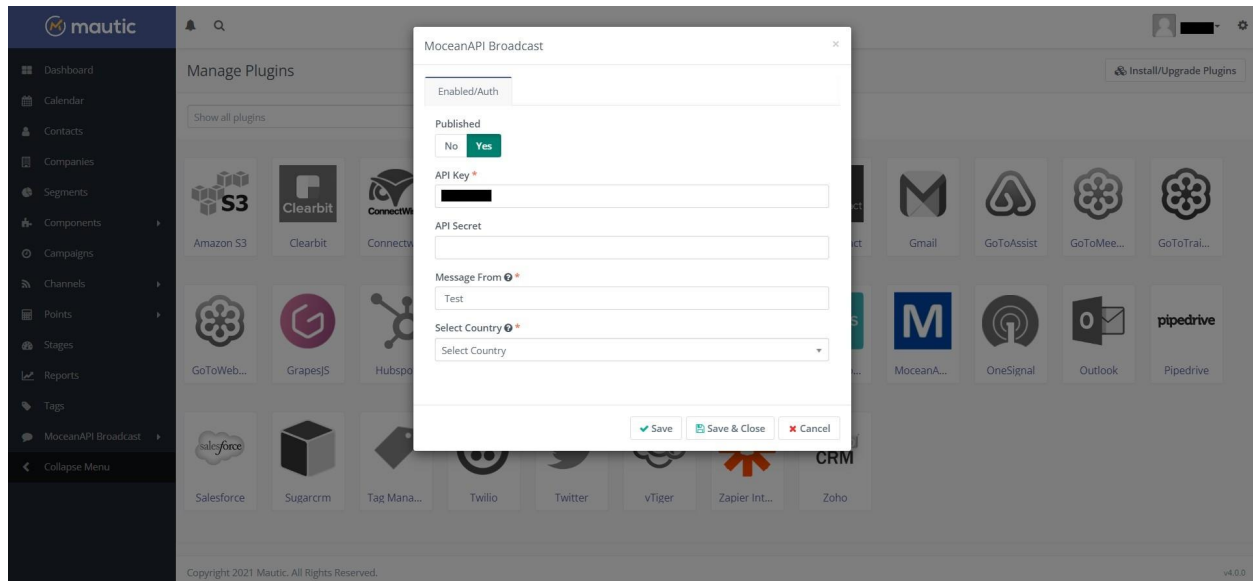

Installation

Install by downloading the code and unpacking the contents into a folder named /plugins/MoceanApiBroadcastBundle.

Clear your Mautic cache and click on "Install/Upgrade plugins" at the Plugin page.

Configuration

In the plugin configuration page, set "Published" to yes to enable the plugin. Users can configure their API key, API secret and sender name. To register for an account, go to <https://dashboard.moceanapi.com/>. For new users, register at <https://dashboard.moceanapi.com/register>.

If correct credentials are given, your credit balance will be shown at the SMS broadcast page.

Users may also choose a default country to check for country code. All mobile numbers will be checked according to the format of the selected country, if the format is incorrect for the selected country, no SMS will be sent and the error response “Invalid format for mobile number” will be given at SMS History Transaction.

Sending SMS

Users can send SMS to:

- All contacts (leads)
- Specific contacts (leads)
- Specific phone numbers

To send SMS to specific phone numbers, users are required to enter the phone numbers with space as delimiter (e.g. 60123456789 60123456666), country code is required :
